SUMMARY

This report provides the reader with information on the business and performance, system of governance, risk profile, valuation for solvency purposes and capital management of PartnerRe Ireland Insurance dac ("the Company" or "PRII dac") for the year ended 31 December 2023.

Section A of this report outlines the Company's business and performance.

Section B of this report outlines the Company's system of governance which includes: the role of the Board of Directors ("the Board") and the Board Committees, delegation of roles and responsibilities, fit and proper requirements, risk management system, internal control system, Compliance function, Risk function, Actuarial function, Internal Audit function and use of outsourcing.

The core of the Company's business model is the assumption and management of risk, which is described in further detail in Section C of this report. The Company is exposed to a number of risks including underwriting, market, credit, liquidity and operational risks. The Company has implemented a comprehensive risk management framework to monitor, manage and mitigate these risks. The most important risk management and mitigation tools of the Company are underwriting and investment guidelines, risk limits, recovery planning, diversification and the use of reinsurance with third parties and affiliate companies.

See section D for more detail on the valuation methods, bases and assumptions for assets and liabilities in the Solvency II balance sheet as well as a comparison with Irish GAAP. There were no significant changes to the valuation basis of the Company's assets and liabilities during the year.

See section E for more detail on the capital management of the Company.

This is the first year the Company has presented its financial statements under FRS 102 "The Financial Reporting Standard applicable in the U.K. and Republic of Ireland" and FRS 103 "Insurance Contracts" ("Irish GAAP") issued by the Financial Reporting Council. The comparative information in this report has been reclassified for adjustments on adoption of Irish GAAP in the current year.

A. BUSINESS AND PERFORMANCE

A.1. BUSINESS

PartnerRe Ireland Insurance dac is a designated activity company limited by shares, incorporated and domiciled in Ireland.

The Company is regulated by the Central Bank of Ireland ("CBI"), New Wapping Street, North Wall Quay, Dublin 1, Ireland.

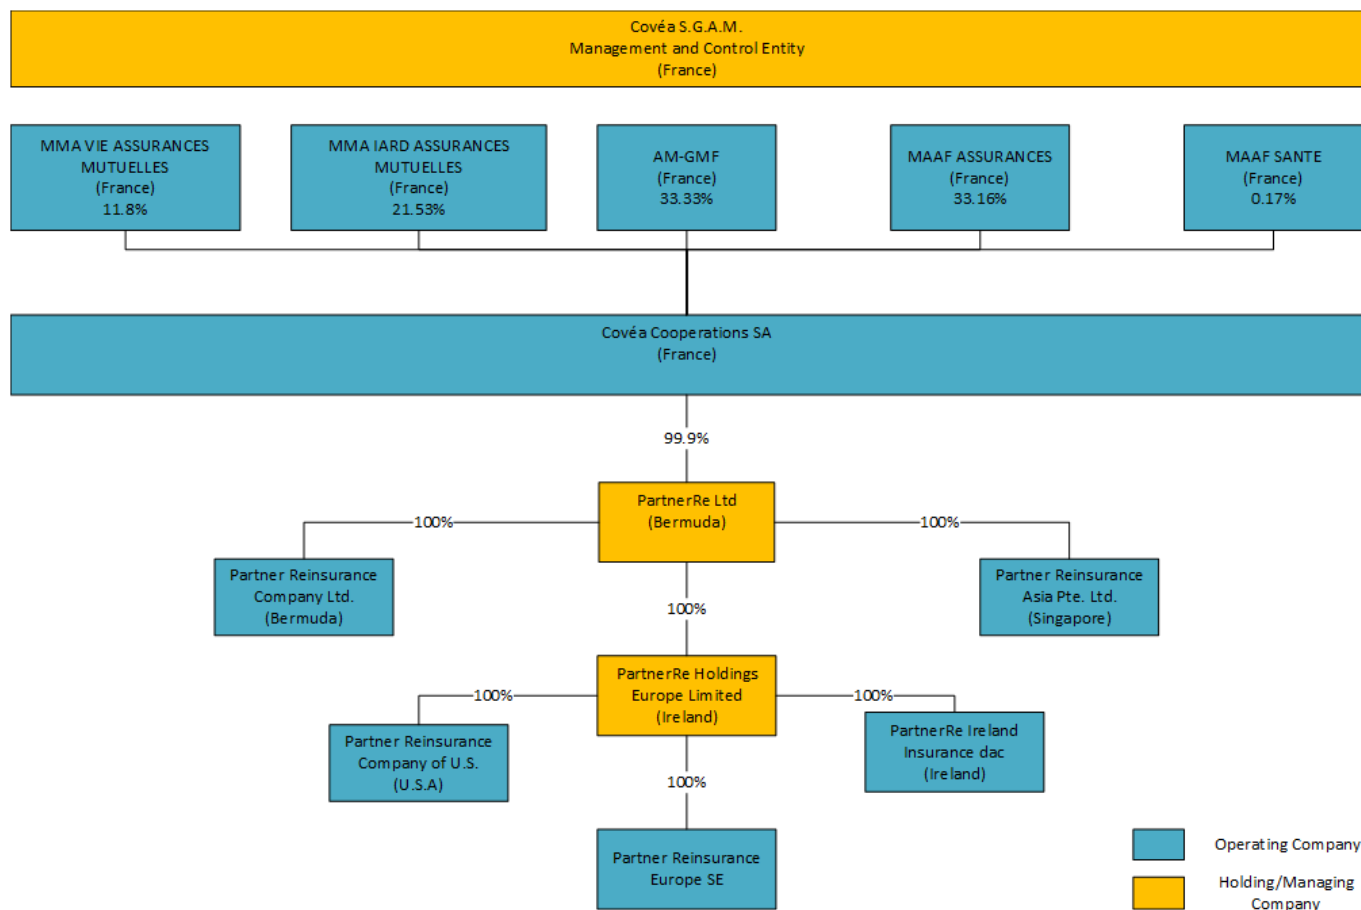

On 30 June 2023, the Company received authorisation from the Financial Conduct Authority and the Prudential Regulation Authority for its U.K. Branch. As a consequence, the Company exited the Temporary Permission Regime and the U.K. branch is now subject to U.K. prudential regulation as a third country branch. This authorisation ensures that the Company can continue to carry out regulated activities in the U.K..

The Company's external auditor is PricewaterhouseCoopers, Chartered Accountants and Statutory Audit Firm, One Spencer Dock, North Wall Quay, Dublin 1, Ireland.

The Company is a member of the PartnerRe group (the "Group"). The parent company of the PartnerRe group is PartnerRe Ltd. ("Group Parent"), a company incorporated in Bermuda. The immediate parent company is PartnerRe Holdings Europe Limited ("PRHEL"), a company incorporated in Ireland. PartnerRe Ltd. is a member of the Covéa Group and a subsidiary of Covéa Coopérations S.A ("Covéa"), a company incorporated in France.

The PartnerRe group is regulated by the Bermuda Monetary Authority, BMA House, 43 Victoria Street, Hamilton, Bermuda. The Covéa group is regulated by the French Prudential Control and Resolution Authority ("ACPR"), 4 Place de Budapest, CS 92459, 75436 Paris Cedex 09.

The following diagram is a simplified Group structure and includes the material related reinsurance and insurance entities in the Group:

The Company's business strategy is to support the Group's overall strategy by providing clients the option to place business classified as insurance with the Group. The Company focuses on sophisticated insurance buyers such as large corporations and multi-nationals who need to place large sums insured, multi-location business or complex risks, typically as co-insurance. The Company does not underwrite retail insurance business.

The Company, through its head office and U.K. Branch, is a multi-class insurance company capable of writing worldwide risks with multi-national access. The Company underwrites non-life insurance and facultative reinsurance business within the following lines of business: aviation, energy, property and casualty.

The Company writes business in a number of geographic areas, primarily the United States, the United Kingdom, Germany, Australia and Canada. Further details can be seen in section A.2. Underwriting performance.

A.2. UNDERWRITING PERFORMANCE

The tables below outline the Company's underwriting performance, as per the Company's financial statements, by Solvency II lines of business for the current and prior year:

	Marine, aviation and transport €'000	Fire and other damage to property €'000	General liability €'000	Credit and suretyship €'000	Total €'000
2023					
Gross premium written	14,908	126,234	91,276	28	232,446
Net premium written	1,583	14,955	9,557	2	26,097
Net premium earned	1,894	13,202	12,505	8	27,609
Net claims incurred	(3,757)	(5,399)	(6,445)	(33)	(15,634)
Net acquisition income	1,151	5,180	576	1	6,908
Other technical charges, net of reinsurance	1	3	3	—	7
Technical result	(711)	12,986	6,639	(24)	18,890

	Marine, aviation and transport €'000	Fire and other damage to property €'000	General liability €'000	Credit and suretyship €'000	Total €'000
2022					
Gross premium written	23,228	104,290	176,537	84	304,139
Net premium written	3,103	10,634	14,097	13	27,847
Net premium earned	3,361	11,081	14,673	21	29,136
Net claims incurred	(2,935)	(4,845)	(11,323)	18	(19,085)
Net acquisition income/ (expense)	823	4,798	(1,453)	—	4,168
Other technical charges, net of reinsurance	(2)	(7)	(10)	—	(19)
Technical result	1,247	11,027	1,887	39	14,200

The marine, aviation and transport line of business includes marine, aviation and energy offshore exposures. The fire and other damage to property line of business includes exposures from property, engineering and energy onshore risks. The general liability line of business includes exposures from casualty risks. The credit and suretyship line of business includes exposures from credit & surety risks.

Marine, aviation and transport

Gross premiums written for the financial year were €14.9m. This represents a decrease of €8.3m when compared to the prior financial year. The decrease was driven by Aviation business.

Net premiums earned for the financial year were €1.9m, representing a decrease of €1.5m year-on-year. This decrease was mainly driven by the reduction in the aviation business mentioned above.

The underwriting result was a loss of €0.7m for the financial year. This represents a decrease of €2.0m when compared to the prior financial year driven by the reduction in premiums on aviation segment combined with an increased loss ratio.

Fire and other damage to property

Gross premiums written for the financial year were €126.2m, representing an increase of €21.9m when compared to the prior financial year. This increase was mainly driven by new business and premium increases in property and energy onshore lines of business.

Net premiums earned for the financial year were €13.2m. This represents an increase of €2.1m compared to the prior financial year. This increase was also driven by new business and premium increases in property and energy onshore lines of business.

The underwriting result was a profit of €13.0m for the financial year. Year-on-year, this represents an increase of €2m, driven by an increase in premium written and a slight decrease in the loss ratio.

General Liability

Gross premiums written for the financial year were €91.3m, representing a decrease of €85.3m when compared to the prior financial year, driven by a decrease in transactional liability premium written by MGAs.

Net premiums earned for the financial year were €12.5m. This represents a decrease of €2.2m when compared to the prior financial year, driven by the decrease in MGA premiums written as noted above, in addition to increased reinsurance.

The underwriting result was a profit of €6.6m for the financial year. Year-on-year, this represents an increase of €4.7m, driven by a decrease in the loss ratio.

Acquisition costs/income

Net acquisition income/expense was a positive €6.9m driven by an increase in override commission income received from reinsurance.

Geographical Analysis

2023	Ireland	Top 5 countries by location of insured					Other	Total
		United States	United Kingdom	Germany	Australia	Canada		
	€'000	€'000	€'000	€'000	€'000	€'000	€'000	€'000
Gross premium written	1,072	179,911	26,621	4,483	4,262	3,639	12,458	232,446
Net premium written	(1,796)	22,066	3,138	355	490	381	1,463	26,097
Net premium earned	999	20,456	2,749	689	461	451	1,804	27,609
Net claims incurred	(2,576)	(8,274)	(3,225)	(477)	89	(234)	(937)	(15,634)
Net acquisition income/(expense)	338	4,408	390	326	190	224	1,032	6,908
Other technical charges, net of reinsurance	—	7	—	—	—	—	—	7
Technical result	(1,239)	16,597	(86)	538	740	441	1,899	18,890

2022	Ireland	Top 5 countries by location of insured					Other	Total
		United States	United Kingdom	Germany	Australia	Canada		
	€'000	€'000	€'000	€'000	€'000	€'000	€'000	
Gross premium written	625	242,128	30,312	7,952	4,738	4,543	13,841	304,139
Net premium written	82	21,597	2,602	976	512	466	1,612	27,847
Net premium earned	32	22,057	3,102	1,074	463	594	1,814	29,136
Net claims incurred	(6)	(15,365)	(1,715)	(312)	(393)	(637)	(657)	(19,085)
Net acquisition income/(expense)	6	2,778	(184)	444	158	316	650	4,168
Other technical charges, net of reinsurance	—	(19)	—	—	—	—	—	(19)
Technical result	32	9,451	1,203	1,206	228	273	1,807	14,200

The decreases in relation to premium written are driven by the decreases in General Liability business, partially offset by increases in Fire and Other Damage to Property which are discussed above.

Given the nature of the commercial insurance business, where the location of the insured is not representative of the location of the risk, the Company does not manage its underwriting result by geography.

A.3. INVESTMENT PERFORMANCE

The following table outlines the investment income and expenses for the current and prior financial years:

	2023	2022
	€'000	€'000
Interest income	3,026	3,077
Net realised losses	(253)	(2,986)
Net unrealised gains/(losses)	7,839	(16,917)
Investment management and other related expenses	(273)	(266)
Total net of expenses	10,339	(17,092)

The Company's investments are entirely allocated to corporate and government bonds, as well as cash and cash equivalents and accordingly interest income arises entirely from these investments. The unrealised gains were primarily driven by the decrease in interest rates throughout 2023.

The Company did not have any investments in securitisations.

A.4. PERFORMANCE OF OTHER ACTIVITIES

Operating expenses increased by €0.9m to €10.6m, with the increase mainly due to higher expenses recharged from related entities for personnel costs and IT costs.

The Company recognised a gain of €0.2m (2022: loss of €2.5m) on foreign exchange in the income statement from the revaluation of all balances held in currencies other than the functional currency of the Company.

The Company recognised a total income tax expense of €2.3m (2022: €1.9m benefit). The effective tax rate is driven by the location of profits/losses recognised across the various tax jurisdictions in which the Company operates, along with the utilisation of tax losses across the tax jurisdictions.

A.5. ANY OTHER INFORMATION

There is no other material information regarding the business and performance of the Company.

B. SYSTEM OF GOVERNANCE

B.1. GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE

The Company is categorised as Medium-Low since 01 January 2023 under the CBI's Probability Risk and Impact System (PRISM) and it has been advised by the CBI that this categorisation will change to Medium-High Impact effective from 01 January 2024. The Company is subject to the Corporate Governance Requirements for Insurance Undertakings 2015 (the "Corporate Governance Requirements"). The Company is satisfied that the corporate structures and practices pertaining to corporate governance as described in the Corporate Governance Requirements are operating effectively.

General governance standards and structure

The Board is responsible for the effective, prudent, and ethical oversight of the Company. The Board is also responsible for, among other things, setting and overseeing:

- The business strategy for the insurance undertaking.
- The establishment of a documented risk appetite framework and the strategy for the on-going management of material risks including, inter-alia, liquidity risk.
- The amounts, types and distribution of internal capital and own funds adequate to cover its risks.
- Ultimate responsibility and ownership for the Company's ORSA process.
- A remuneration framework that is in line with the risk strategies of the insurance undertaking.
- A robust, transparent organizational structure with effective communication and reporting channels.
- An adequate and effective internal control framework, that includes well-functioning and properly resourced risk management, compliance, actuarial and internal audit functions that are independent of business units and possess adequate authority to operate effectively.
- The appointments of Directors and a General Manager and senior management with appropriate integrity and adequate knowledge, experience, skill, and competence for their roles and endorsing the appointment of people who may have a material impact on the Company's risk profile and monitoring on an on-going basis their appropriateness for the role.
- Oversight of its committees.
- The establishment of a Conflicts of Interest Policy for Board Members.

Where the Company applies a group policy or engages a group function, the Board shall satisfy itself as to the appropriateness of these policies for the Company and whether these policies or functions take full account of Irish laws, regulation and the requirements of the Central Bank of Ireland.

The Board shall ensure that no one individual has unfettered decision making power within the Company.

The Board has established two sub-committees: the Audit Committee and the Risk Committee. From Q2 2022, proceedings of the Board (which comprises only 5 members composed of four Non-Executive Directors ("NEDs"), two of whom are Independent Non- Executive Directors ("INEDs") and an Executive Director) sitting as the Audit Committee and the Risk Committee. This approach is in accordance with Section 19.1 of the Central Bank of Ireland's Corporate Governance Requirements 2015 with provision for the adoption of alternative arrangements by the sub-committees at all times if appropriate upon determination by the Board.

The Audit Committee

The Audit Committee has been established to oversee the Company's financial reporting process and the internal control environment on behalf of the Board. The Audit Committee is governed by an Audit Committee Charter which reflects that the Chair of the Audit Committee is an INED and it is composed of the full Board, including the Chair

and the CEO, where the Board acts as the Audit Committee in accordance with Section 19.1 of the Central Bank of Ireland's Corporate Governance Requirements 2015.

The Risk Committee

The Risk Committee has been established to provide oversight and advice to the Board on the Company's current risk exposures and its future risk strategy. The Risk Committee has oversight responsibility for company policies and activities related to overall management of the Company's risks pursuant to the business strategy and risk management policy established by the Board. The Risk Committee is governed by a Risk Committee Charter which reflects that the Chair of the Risk Committee is an INED and it is composed of the full Board, including the Chair and the CEO, where the Board acts as the Risk Committee in accordance with Section 19.1 of the Central Bank of Ireland's Corporate Governance Requirements 2015.

Powers Delegated by the Board

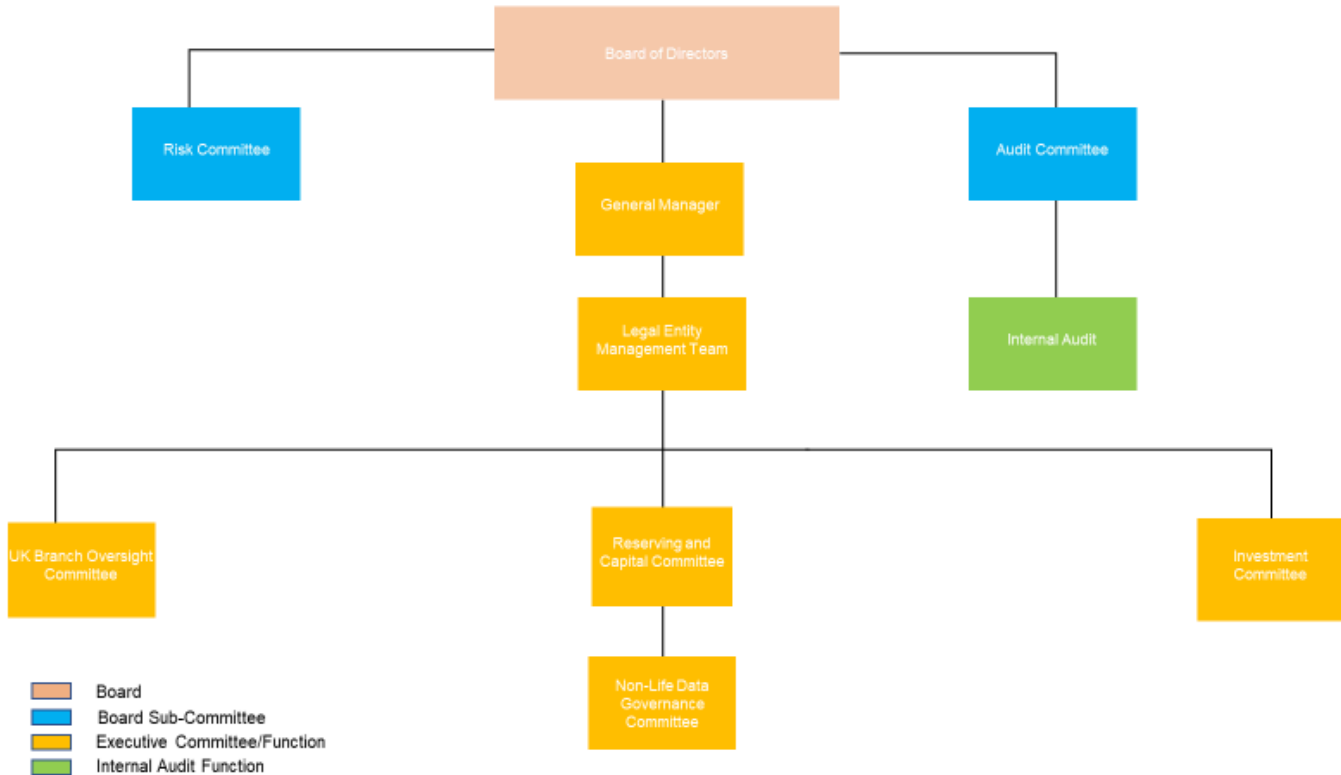

The Board has reserved certain powers for itself and has delegated other powers. This delegation is documented in the Board's Delegation of Authority Policy which is part of the Board's Charter. Authorities that have not been reserved for the Board are delegated to the General Manager.

Under this authority, the General Manager has established an Executive Committee, called the Legal Entity Management Team ("LEM").

The LEM is the senior executive team within the Legal Entity and is established for the purpose of providing advice and making recommendations to the General Manager in respect of the Company's operations. The LEM is responsible for managing the overall business, implementing the business plan in line with the agreed strategy and overseeing the management of risk and regulatory compliance across the organisations.

The Company's LEM comprises the Company's General Manager, Chief Risk Officer, Head of Actuarial Function, Head of Finance and Head of Compliance and the LEM has established the following subcommittees to support its management of the Company:

- Legal Entity Reserving and Capital Committee
- UK Branch Oversight Committee
- Investment Committee

Legal Entity Reserving and Capital Committee

The Legal Entity Reserving and Capital Committee is responsible for the quarterly review and approval of the Technical Provisions, Solvency Capital Requirement, Economic Balance Sheet and Own Funds of the Company before the quarterly QRTs are filed with the CBI. The Committee also reviews these items in advance of the submission of annual returns and makes recommendation to the Audit Committee in respect of the returns.

The Committee also reviews and approves the assumptions and assumption changes supporting the calculation of the Technical Provisions on an annual basis before submission to the Board.

The Committee is chaired by the Head of Finance and the other members are the Head of Actuarial Function, the Chief Risk Officer and the General Manager. The Committee meets at least quarterly

Non-Life Data Governance Committee

This Committee is a sub-committee of the Legal Entity Reserving and Capital Committee. The Committee is responsible for overseeing adherence to the Data Governance Framework. The Committee meets bi-annually and consists of data owners and data processors providing data for the valuation of the SII Technical Provisions.

The Committee is chaired by the Non-Life Head of Actuarial Function and its members are the Head of Finance, CRO, Non-Life Actuarial Function Senior Actuary, Head of Non- Life Pricing, Head of Underwriting Analysis, Head of Underwriting Operations Analysis, Head of Reinsurance Accounting and Chief Non-Life Reserving Officer.

U.K. Branch Oversight Committee

The Committee is the Governing Body, as defined in the Prudential Regulatory Authority's ("PRA") Rulebook, of the UK Branch.

Its responsibilities include management and oversight of the UK Branch. In addition, the Committee reviews and approves the UK specific regulatory returns and the approval of UK Branch specific policies for Risk Management, Internal Audit, Outsourcing, Regulatory Reporting and Compliance.

The Committee is chaired by the General Manager and its members are the U.K. Branch Manager, Head of Finance, Chief Risk Officer, Head of Actuarial Function, Head of Compliance and Senior Legal Counsel.

Investment Committee

The Committee is responsible for providing oversight of investments and monitoring and analysing the Company's investment results and portfolio movements. In addition, the Committee reviews any potential investment opportunities.

The Committee ensures that the investment portfolio remains compliant with the investment guidelines, asset allocation plan and risk appetite limits.

The Committee is chaired by the Head of Finance and the other members are the General Manager, Chief Risk Officer and the Head of Investments. The Committee meets at least monthly.

Authority and independence of key functions

The Company has the following key functions: Risk Management, Actuarial, Finance, Internal Audit and Compliance. Risk Management, Actuarial, Finance and Compliance functions report to the General Manager. Internal Audit reports to the Audit Committee.

Risk Management function

The Risk Management function has independent oversight of risk management activities including identifying, assessing, monitoring and reporting existing and emerging risks. The Risk Management function monitors the risk profile of the Company's position against risk appetite statements and tolerances and reports deviations in line with agreed reporting procedures.

The Chief Risk Officer ("CRO") leads the Risk Management function, is also a member of the LEM and a Pre-Approved Controlled Function ("PCF") 14 under the CBI's Fitness and Probity regime.

The CRO reports on a quarterly basis to the Risk Committee.

Actuarial function

The Company has a Head of Actuarial Function ("HoAF"). The HoAF is responsible for coordinating the calculation of technical provisions, informing the Board of the reliability and adequacy of the calculation of technical provisions and providing an opinion on the Company's technical provisions, ORSA, reinsurance and underwriting policy.

The HoAF is a member of the LEM and a PCF 48 under the CBI's Fitness and Probity regime.

Finance function

The Company's Finance function has responsibility for ensuring the accuracy of the Company's financial reporting and quarterly/annual statutory and regulatory filings, ensuring compliance with relevant accounting standards and corporate law requirements, the monitoring of solvency ratios and calculations and ensuring that sufficient capital is maintained to meet business and regulatory requirements.

The Head of Finance is a member of the LEM and a PCF 11 under the CBI's Fitness and Probity regime.

Internal audit

Internal Audit is an independent evaluation and appraisal function reporting to the Board through the Audit Committee. Internal Audit examines and evaluates the functioning of the internal controls and other elements of governance and provides independent assurance over the operations of the Company. Internal Audit's responsibilities are set out in the Internal Audit Charter.

The Head of Internal Audit, who is a PCF 13 under the CBI's Fitness and Probity regime, attends LEM meetings on at least a quarterly basis and reports to the Audit Committee and the Board on a quarterly basis.

Compliance function

The Compliance function advises the Company on compliance with the laws, regulations and administrative provisions adopted pursuant to the Solvency II Directive. The function also identifies and assesses the impact of any changes in the legal environment, on the operations of the Company. In addition, the function designs, implements and executes a compliance monitoring framework to provide assurance to the Board on the adequacy of measures taken by the company to meet regulatory requirements.

The Head of Compliance is a member of the LEM and a PCF 12 under the CBI's Fitness and Probity regime.

Material changes in the governance of the Company during the year

The Chair of the Board who was also a Group Non-Executive Director resigned from the Board of the Company during 2023, a current Group Non-Executive Director was appointed to the role of the Chair. One additional Group Non-Executive Director was appointed to the Board during 2023.

Material transactions

There were no transactions during the reporting period with shareholders, with persons who exercise a significant influence on the undertaking, and with members of the Board other than:

- Directors' remuneration; and
- Intra-group transactions in the normal course of business.

The intra-group transactions in the normal course of business consisted of:

- Reinsurance agreements with other PartnerRe Group entities:
 1. Whole account quota share with Partner Reinsurance Europe SE ("PRESE"):
 - a. 85% for underwriting years 2022 and prior;
 - b. 50% of certain Casualty risks, 90% of certain Property catastrophe risks and 80% of all other lines of business for underwriting years 2023 and subsequent; and
 - c. 90% for a small number of named risks.
 2. Stop loss agreement with Partner Reinsurance Company Ltd ("PRCL"), attaching at a loss ratio of 120% with a limit of 870%.

The reinsurance arrangements were also in place during 2022 with broadly similar terms and conditions.

- Recharges for staff costs and other outsourced services. Further details of outsourced services are provided at section B.7. Outsourcing.

Remuneration Policy

The Remuneration policy is approved by the Board. It is the intention of the Company to ensure that the ways in which it remunerates its employees, officers and directors meets with good practice standards as well as applicable regulatory requirements.

The Remuneration Policy is designed to meet the following objectives:

- Align the long-term interests of the Company's participants and shareholders;
- Deter excessive risk taking;
- Establish competitive pay levels on a total compensation basis;
- Clearly link pay with performance;

- Provide flexibility in form and structure to meet individual time horizons;
- Demonstrate good governance and corporate responsibility; and
- Encourage the retention of the Company's participants.

The Board considers the following structure of remuneration to be appropriate, in the context of the Company's activities and the applicable regulatory requirements:

- The philosophy is to remunerate at the median of the appropriate market.
- Remuneration is comprised of base salary and variable remuneration.
- Local requirements relating to remuneration structures will be respected as appropriate.

With regard to the remuneration of its INEDs the Company's policy is that, in keeping with their duty of independence, they shall be remunerated by a fixed fee only, and no incentive-based payments will be made.

It is the Company's policy that NEDs who are employees of the Group receive no remuneration for their duties as Directors of the Company.

The variable components of remuneration are annual incentive and Long Term Incentive ("LTI") awards. The annual incentive is a variable, performance-based component of compensation. Each employee has a target annual incentive payment, which is set as a percentage of base salary. The actual payment is then based on a combination of business unit performance, individual performance and overall Group performance. The target metrics are set by the Group each year.

Pension entitlements are typically paid on a contribution basis and are based on a percentage of the participant's base salary depending upon competitive local market practice and vesting provisions meeting legal compliance standards and market trends. Certain Swiss based employees, who are employed by PartnerRe Holdings Europe Ltd. are members of a hybrid pension plan, which contains elements of a defined benefit and defined contribution plan.

Adequacy of the system of governance

The system of governance has been established taking account the size, nature and scale of the Company's operations and the complexity of inherent risks. The Compliance Function conducts an annual review of adherence to the Corporate Governance Requirements and reports to the Board on the review outputs and any recommended governance enhancements. This informs assessment of the adequacy of the system of governance which has been satisfactorily assessed as adequate for the Company.

Processes for monitoring the effectiveness of the system of governance

The roles and responsibilities of the Board and its Committees, as outlined under their respective Charters, are reviewed and updated at least annually.

Assessment of Board and Committee performance

The Board formally reviews its overall performance, relative to the Board's objectives, on an annual basis. This includes a review of the Audit Committee and the Risk Committee in relation to their respective performances.

Annually, each director performs a self-assessment whereby he or she evaluates his or her performance against a range of key performance indicators. In addition, each Board Director completes an annual Board Evaluation reviewing the overall performance of the Board and that of individual directors, relative to the Board's objectives.

Corporate Governance

The Board receives quarterly updates from the Company's Compliance function in respect of the activity of the Compliance function in the quarter. As part of this report, details of new regulatory and legal requirements and the assessed impact that they will have on the Company are provided to the Board. In addition, the report provides details of any compliance monitoring activity that has taken place in the quarter concerned. Such reporting is

designed to provide the Board with sufficient comfort that the Company has complied with all requisite regulatory and legal requirements and, where necessary, to highlight any occasions on which the Company has deviated from such requirements.

Internal audit plan

The Board, with the assistance of the Audit Committee, monitors the effectiveness and adequacy of the Company's internal controls (including the Company's financial reporting process) and I.T. systems through reports received from the Internal Audit function as per Internal Audit's plan. The Board and the Audit Committee review and approve the Internal Audit plan on an annual basis.

Adherence to Group and Company policies, guidelines, procedures and use of Group functions

The Board satisfies itself as to the appropriateness of compliance with Group policies for the Company and in particular that these policies and functions take full account of local business needs, Irish laws and regulations and the supervisory requirements of the CBI. Where necessary, Company specific guidelines are put in place in addition to the Group policies to ensure compliance with local business needs and laws, regulations and supervisory requirements.

B.2. FIT AND PROPER POLICIES AND PROCEDURES

As an insurance undertaking authorised by the CBI, the Company is subject to the CBI's Fitness and Probity Standards.

The Company's Fitness and Probity Policy (the "Policy"), which is reviewed and approved annually by the Board, governs its fitness and probity procedures which determine which roles fall under the Fit and Proper ("F&P") Standards.

These procedures also provide a mechanism for collating and assessing information to evidence compliance with the F&P Standards and ensuring that all relevant individuals meet and continue to meet them and fulfil any training obligations. The Policy and the procedures cover due diligence requirements relating to:

- New appointments of individuals performing PCFs and Controlled Functions ("CF"s);
- Internal PCF and CF role transfers and promotions;
- Outsourcing of PCF and CF roles;
- On-going due diligence of individuals performing PCF and CF roles; and
- Potential consequences if an individual performing a PCF or CF role does not meet or no longer meets the Fitness and Probity Standards.

The Company's due diligence involves analysis of the competencies and degree of probity required to discharge a particular function (and whether the responsibilities of the function fall into a PCF or CF category). This ensures that individuals' qualifications, professional skills, knowledge and experience correspond with role requirements and they have maintained professional qualifications by completing continuous professional development where required. It serves to ensure that individuals discharging a particular function have the competence and ability to understand the technical requirements and inherent risks of the business and the management processes required to conduct its operations effectively. If deemed necessary, relevant and comprehensive training is carried out in conjunction with the PCF or CF appointment process together with the provision of relevant training on an ongoing basis.

The Company maintains records of the due diligence undertaken in respect of individuals performing PCF or CF roles on its behalf prior to their appointment and annually to evidence their ongoing compliance with the Fitness and Probity Standards. The annual process involves ensuring their completion of a detailed Annual Certification which includes confirmation of compliance with the Fitness and Probity Standards and certification of probity, financial soundness, that all employment and directorships have been disclosed and will not materially impact performance of a PCF role and that continuing professional development has been completed where required to maintain a necessary qualification. Outputs are reviewed by the Head of Compliance and results of the due diligence are

recorded. Each individual performing a PCF or CF role receives a certificate of Compliance from the company confirming that they are fit and proper to undertake their role.

The due diligence outputs form the basis of the Board's endorsement of the appointment of individuals performing PCF roles within the Company (including all Board Members) and those who may have a material impact on its risk profile (being the General Manager, Head of Finance, Chief Risk Officer, Head of Internal Audit, Head of Compliance, Head of Actuarial Function, UK Branch Manager, Head of Underwriting, Head of Investments and Head of Claims).

B.3. RISK MANAGEMENT SYSTEM INCLUDING THE OWN RISK AND SOLVENCY ASSESSMENT

The Company has implemented a Risk Management Framework ("RMF") which sets out the key components of its risk management system: risk governance and controls, risk identification and assessment, risk appetite, ORSA and monitoring and reporting.

Three lines of defence

The Company operates with a three lines of defence model. The first line of defence owns and manages risks and is responsible for implementing internal control measures to ensure compliance with all applicable laws and regulations.

The Compliance and Risk functions are part of the second line of defence and are responsible for the following activities:

- Developing risk management frameworks and policies;
- Identifying, assessing and communicating known and emerging issues and risks;
- Identifying shifts in the Company's risk profile;
- Communicating compliance and regulatory risk scenarios;
- Assisting management in developing processes and effective controls to manage risks;
- Monitoring the implementation of risk management processes and internal controls;
- Monitoring the adequacy and effectiveness of internal controls;
- Proactively testing and monitoring high risk areas to ensure policies and procedures are being implemented properly;
- Providing guidance and training on risk management processes; and
- Managing the timely remediation of deficiencies.

The Head of Actuarial Function (HoAF) is, in certain aspects of their role, part of the second line of defence (independent of the first line Reserving function) and provides independent review and advice to management, the Audit Committee and the Board on data, models, methodologies and assumptions.

The third line of defence is Internal Audit who assist management and the Board in achieving corporate objectives and discharging their duties and responsibilities by bringing a systematic and disciplined approach to evaluating and improving the effectiveness of the Company's risk management activities, internal controls and governance processes.

Risk governance and controls

The Risk function consists of the CRO and the supporting Risk team. The CRO and the Risk team collaborate with and are supported by Risk resources in other Group entities. The CRO reports to the General Manager and reports directly to the Risk Committee and the Board.

Responsibilities of the Board and its Committees are set out in section B.1. Specific responsibilities of the Board include setting the overall risk appetite and risk limits, overseeing and reviewing the key risks of the Company, approving the risk strategy, the RMF, risk policies, ORSA and the Recovery Plan and promoting a culture which is conducive to effective risk management.

The Company's risk policy framework addresses groups of homogenous and related risks and establishes risk management approach, risk appetite, mitigation principles, risk ownership, governance and escalation procedures. Individual risk policies are supported by sub-policies and operating guidelines. The risk policy framework consists of Group and Company risk policies which are reviewed and approved at least annually.

The Company uses PartnerRe's internal control application system, Archer, to document internal controls. Controls and other risk management activities are performed by process owners within the business units and support functions throughout the year. Internal Audit conducts audits which test the controls to ensure appropriate design and operational effectiveness.

Risk identification and assessment

The CRO coordinates and performs an annual risk identification and assessment process to assess the Company's risks and identify any new or emerging risks and important trends. This process facilitates the setting of risk appetite by the Board and the management of material risks. In response to current events, ad-hoc risk assessments of individual risks may also be conducted.

The Company's risks are structured in a risk universe which is constantly evolving in response to the evolving risk profile of the Company. The risk universe intends to capture all relevant material and potentially material risks. Each risk in the risk universe has a risk owner. The CRO monitors the risk profile on an ongoing basis through interaction with the LEM and business leaders and through participation in relevant Group Committees.

At least annually, a risk identification workshop is held with the LEM to review the Company's risk universe and ensure that all material and potentially material risk categories are captured. Separately, an annual emerging risk workshop is held with the LEM and business leaders to discuss and identify emerging risks for the Company. Any new risks identified are assigned a risk owner by the CRO in consultation with the LEM.

The CRO, in collaboration with the risk owners and other subject matter experts, assesses each risk of the risk universe at least annually. The individual risk assessments are documented and consider the regulatory, operational and control environment, key exposures, correlation with other risks and mitigation. For assumed risks, the tail loss potential is quantified.

The CRO prepares an annual Risk Assessment Report which summarises the individual risk assessments. The Risk Assessment Report is presented to the LEM for review and input and then discussed with the Risk Committee and Board. The Risk Assessment Report assists the Risk Committee and Board in understanding the Company's risk profile and the setting of risk appetite and risk limits.

Risk appetite

Risk appetite is the overall level of risk the Company is prepared to accept in pursuit of its strategic objectives. Risk appetite, risk limits, capital level and reinsurance structure are considered and inform the setting of the Company's strategy and business plan.

Risk appetite is documented in the Risk Appetite Framework ("RAF"). The RAF is reviewed at least annually and approved by the Board. In setting its risk appetite, the Board considers stakeholder expectations alongside the business environment and risks including the current level of risk in the business plan and strategy.

Risk appetite is structured into Risk Appetite Statements and Risk Limits and Tolerances.

Risk appetite statements

The Company defines risk appetite statements for all categories of its risk universe.

Risk limits and tolerances

The Company defines key risk indicators as quantitative or qualitative risk limits following a red-amber-green scale ("RAG"), covering the Solvency II ratio, all material assumed risks as identified in the latest Risk Assessment, and non-assumed risks and non-material assumed risks as considered appropriate.

Risk monitoring and reporting

Risk owners and the Risk function monitor risks on an ongoing basis through regular reports, interaction, participation in approval processes and management meetings.

The CRO reports on a quarterly basis to the Risk Committee and the Board. The quarterly risk report to the Risk Committee includes reporting on compliance with the RAF, risk limits, operational incidents and any other relevant developments such as changes in reinsurance.

In times of financial or operational stress, the LEM, the Risk Committee and the Board are updated on the Company's risk profile more frequently.

Own Risk and Solvency Assessment

The Company undertakes at least annually an internal assessment of its risk and solvency positions and evaluates these against the business plan. The ORSA report builds on the Risk function activities throughout the year and aligns with the business planning and strategy setting process. The capital projections in the ORSA are based on projections of own funds and SCR according to the Standard Formula and the multi-year business and investment plans. Projected capital adequacy is assessed against the Company's overall risk appetite and risk limits and tolerances. The outcome of the ORSA informs the planning process.

The ORSA process encompasses the regular review of the ORSA policy and governance framework, the annual risk identification and assessment process, the review and continuous evolution of risk appetite and risk limits and tolerances, risk monitoring, and stress testing, reverse stress testing and capital projections. Stress testing is based on the Company's view of which risks are material.

Individual components of the ORSA process directly inform the Company's risk management system. The annual Risk Assessment informs the Company's risk monitoring as well as stress testing in the ORSA. The ORSA projections inform business planning, risk management and risk monitoring activities. The ORSA projections also inform capital management such as the design of the Company's reinsurance programme or the identification of the need for capital injections.

The ORSA is prepared annually (or more frequently if warranted) by the CRO, reviewed by the HoAF who documents her opinion, the LEM and the Risk Committee. The Board ultimately approves the ORSA. Following approval, the Company submits the ORSA to the CBI.

Elements of the ORSA process are also applied to large portfolio initiatives or in times of stress.

Recovery planning

The Company prepares a pre-emptive Recovery Plan in line with the requirements set out in S.I. No. 184 of 2021 – Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Recovery Plan Requirements for Insurers) Regulations 2021 and the CBI Recovery Plan Guidelines for (Re)Insurers.

The CRO coordinates a comprehensive review of the Recovery Plan on an annual basis or following a material relevant change in the risk profile, solvency, liquidity or operational situation. The Recovery Plan is reviewed by the LEM, the Risk Committee and the Board and subject to approval by the Board.

The Recovery Plan is integrated into the RMF. Recovery indicators are aligned to the extent possible with the key risk indicators defined in the RAF. Early warning and recovery thresholds complement the RAG ranges of the respective key risk indicators in the RAF. Recovery scenarios and recovery options are quantified consistently, where relevant, with the ORSA scenarios and stress testing.

B.4. INTERNAL CONTROL SYSTEM

The Company's internal control system is designed to adequately and effectively identify, manage, monitor and report on the risks the Company is or may be exposed to in order to secure compliance with applicable laws and regulations. It is also designed to detect and correct non-compliance in an efficient and effective manner.

The internal control system consists of a series of preventative and detective controls to prevent, mitigate and detect risk manifestation. The control system allows for escalation of control failures.

The Company will employ risk mitigation techniques as deemed appropriate to remove or reduce risks and remain within the stated risk appetite.

The Board ultimately oversees the internal control system and is supported by the Audit Committee. The Company's Compliance, Finance, Actuarial, Risk Management and Internal Audit functions are all key contributors to the governance and oversight of the Company's internal control system.

There are established robust internal controls in existence across each of these key functions in addition to the controls in place across all other areas e.g. Underwriting, Claims, Investments and Information Technology ("IT").

Compliance function

The Compliance function is responsible for:

- advising the Company on compliance with applicable laws, regulations and administrative provisions adopted pursuant to the Solvency II Directive;
- providing necessary training to staff, on the laws and regulations applicable to the Company;
- identifying and assessing the possible impact of any changes to the applicable laws and regulations, within the scope of the Compliance function, on the operations of the Company and the identification of compliance risk;
- providing assurance to the Board on the adequacy of measures that have been taken by the Company to comply with applicable regulations;
- promoting the importance of the internal control system;
- co-ordinating the Company's response to regulatory consultations;
- managing the relationship with the CBI and other financial services regulators;
- designing, implementing and executing a compliance monitoring framework; and
- maintaining the Company's operating licenses and registrations.

The Company's Compliance Framework comprises the tools that the Compliance function employ to meet its responsibilities. The Compliance Framework is comprised of the following elements:

- Compliance watchlist
- Compliance business plan
- Compliance monitoring plan
- Compliance calendar
- Management and co-ordination of compliance policies
- Training programme

Quarterly compliance reporting to the Board includes, but is not limited to:

- pending or future regulations and legislation which will affect the Company and for which adequate time and resources shall be allocated to meet the requirements;
- details of regulatory visits or significant contacts;
- updates on progress against the approved compliance business and monitoring plans with particular reference to the adequacy of compliance resources; and
- any other relevant information.

B.5. INTERNAL AUDIT FUNCTION

Internal Audit's role is to provide the Audit Committee and Board with an independent appraisal function to assess the Company's internal control and operating environment so as to provide reasonable assurance that:

- operations are effective & efficient;
- financial reporting is reliable;
- there is compliance with laws & regulations;
- assets are appropriately safeguarded; and
- the Company's risk management policies are consistently applied as documented.

Annually, Internal Audit provides the Audit Committee and Board with an overall assessment of the condition of the Company's internal control environment based on a risk based internal audit program.

Internal Audit reports functionally to the Audit Committee in order to ensure independence, and acts as the third line of defence. The function closely interacts with the second line of defence (e.g. Risk Management and Compliance) in relation to risk identification and risk assessment. Internal Audit leverages the work of the second line of defence when deemed appropriate from a governance and independence point of view.

Internal Audit regularly tests the Company's risk policies and the internal controls associated with the respective policies. The results of such testing are included in audit reports circulated to management, and summaries of the results are provided to the Audit Committee and Board.

Independence of Internal Audit

Internal Audit reports directly to the Company's Audit Committee on a quarterly basis and also separately meets with the INEDs on at least an annual basis. Internal auditors have no direct operational responsibility or authority over any of the activities they review. Additionally, they do not install systems or procedures, prepare records, or engage in any other activity that would normally be audited. Internal auditors do not carry out any other functions within the Company.

B.6. ACTUARIAL FUNCTION

The Actuarial function is a key function of the Company's system of governance.

The Actuarial function is split into first line of defence and second line of defence. First line teams are responsible for production of reserves, performance of controls, monitoring of data quality, management of actuarial models, production of experience analysis and best estimate assumptions, and documentation of these processes. Second line teams led by the HoAF provide an independent review and advice to management and the Board on data, models, methodologies and assumptions.

The Actuarial function's tasks are undertaken by a team who have the appropriate knowledge of actuarial and financial mathematics and experience, proportionate to the nature, scale and complexity of the risks present in the business.

The duties of the Actuarial function are under the responsibility of the HoAF who provides independent oversight and reports to the Board via the Audit and Risk Committees. The HoAF is a member of the Society of Actuaries in Ireland with the relevant level of experience required for the role.

B.7. OUTSOURCING

The Company is part of a multi-national reinsurance group and as such the Company uses the expertise and resources from other Group entities and jurisdictions under a shared services model. The Company's outsourcing arrangements are predominately comprised of support provided via intra-group arrangements. These include support in relation to underwriting, business development and underwriting authorities, claims, regulatory legal and compliance, finance, internal audit and investments. The outsourcing of such services to intra-group affiliates falls within the scope of the Company's Outsourcing Framework. Activities provided by the Company's branch and by way of the contractually prescribed supply of personnel within Group legal entities fall outside the scope of the Company's outsourcing framework.

The Company outsources certain critical or important functions to third parties in respect of underwriting and claims handling.

The parties to whom the Company outsources are based in Ireland, the U.K., the U.S., Singapore and Bermuda.

The Company has adopted the Group's Outsourcing Guidelines (the "Guidelines") which establish the Outsourcing Control Framework and sets out parameters within which the Company can enter into outsourcing arrangements. The Guidelines are approved by the Board on an annual basis.

The Guidelines impose clearly defined roles and responsibilities and embeds ownership of outsourcing arrangements within the Company.

The Company's Outsourcing Control Framework is designed around the following key pillars:

- **Due Diligence:** materiality of all functions or activities considered for outsourcing are assessed and due diligence commensurate to the risks of the outsourcing is undertaken. Critical or important outsourcing arrangements are subject to more detailed consideration, examination and regulatory notification than non-critical outsourcing arrangements.
- **Written Agreements:** all outsourcing arrangements are evidenced by a written contract.
- **Register of Outsourcings:** a register of outsourcings is managed by the General Manager and identifies, inter alia, the service recipient, service provider, service provider owner, description of services, whether the outsourcing is intra-group or third-party, materiality, location of service delivery, monitoring and oversight controls, confirmation that an agreement is in place, the services' commencement and termination date, due diligence undertaken and confirmation of service provider business continuity plans.
- **Monitoring Oversight and Reporting:** oversight controls and procedures are commensurate to the risks of the outsourcing in question and must be sufficient to facilitate appropriate oversight and supervision of the outsourcing by the service recipient owner, the Company's General Manager and the Company's Board. Oversight of outsourcing must also promptly identify any material changes, issues and/or deficiencies. There is quarterly reporting to the Risk Committee and the Board.

The Company categorises controls in respect of its outsourcings as follows:

- **Level 1:** Local Company employee representation within the relevant business or support unit providing intra-group services to the Company;
- **Level 2:** Regular meetings between the service provider and the Company and the establishment of embedded communication channels;
- **Level 3:** Formal reporting from the service provider to the Company including, where appropriate, reporting directly to the Company's senior management team, Board and/or Audit or Risk Committees; and

- Other Bespoke Controls: Relevant for third party service providers according to relevant third party and type of service(s) outsourced.

Annual Review Process: On an annual basis, the Risk function assesses the relevant risks to the Company in respect of its existing and proposed outsourcing arrangements and confirms whether sufficient controls and procedures are in place to manage such risks and, where relevant, identifies any proposed recommendations to improve the Outsourcing Control Framework.

B.8. ANY OTHER INFORMATION

There is no other material information regarding the system of governance of the Company.

C. RISK PROFILE

Risk profile

The Company comprehensively identifies and assesses risks in the annual risk identification and assessment process, resulting in the Risk Assessment Report. Key risks identified in the Risk Assessment report are regularly monitored by risk owners, the Risk function and in the Risk Committee. Details are included in section B.3 of this report.

The Company manages risk exposures in the individual underwriting and investment units with operating limits such as those expressed in the Underwriting and Investment Guidelines. There remains a chance that losses can exceed predefined thresholds, for example, if multiple losses occur within the same year or if the Company's internal assessment of capital at risk for a single or multiple sources of risk proves insufficient. To reduce the chance of these unfavourable outcomes, the Company strives for a well-diversified and balanced book of business, applies and regularly monitors risk limits for material key risks, and manages its net position with reinsurance to internal and external counterparties and with other risk mitigation strategies.

Mitigation of underwriting risk by use of reinsurance

The Company uses external reinsurance agreements to reduce its exposure on certain assumed underwriting risks and to mitigate the effect of any single major event or the frequency of medium-sized events. These agreements provide for the recovery of a portion of losses and loss expenses from reinsurers.

The Company's external reinsurance agreements cover most of its non-life classes of business and are bought on a proportional and non-proportional basis.

Reinsurers must be approved based on their financial condition and business practices, with stability, solvency and credit ratings being important criteria. Capacity and credit rating limits per reinsurer are put in place and monitored to mitigate counterparty credit risk.

The Company remains liable to its policyholders to the extent that the reinsurers do not meet their obligations under reinsurance agreements and, therefore, reinsurance is subject to credit risk in all cases and to aggregate loss limits in certain cases. The Company holds collateral, securities and letters of credit under certain reinsurance agreements. Provisions are made for amounts considered potentially uncollectible and reinsurance losses recoverable from reinsurers are reported after allowances for uncollectible amounts.

The Company further mitigates assumed underwriting risk with the purchase of internal reinsurance cover from other Group companies. The cover that the Company has in place with other Group companies as at 31 December 2023 can be summarised as follows.

(1) Whole account quota share with Partner Reinsurance Europe SE ("PRESE"):

- 85% for underwriting years 2022 and prior;
- 50% of certain Casualty risks, 90% of certain Property catastrophe risks and 80% of all other lines of business for underwriting years 2023 and subsequent; and
- 90% for a small number of named risks

(2) Stop loss agreement with Partner Reinsurance Company Ltd (PRCL), attaching at a loss ratio of 120% with a limit of 870%.

External reinsurance inures to the benefit of internal reinsurance.

The main objectives of the reinsurance cover are to reduce the capital requirements and associated cost of capital for the Company, to ensure the Company is in a position to be a well-capitalised insurer for its clients, and to ensure the Company receives and maintains an appropriate rating from the rating agencies.

C.1. UNDERWRITING RISK

The Company uses a number of tools and metrics which help to monitor and mitigate the risks inherent to its underwriting activities which is the core business of the Company:

- underwriting and pricing guidelines;
- underwriting and pricing processes and controls; and
- regular risk reporting on selected key risk indicators for material risks of the Company.

The Solvency Capital Requirement ("SCR") in the Solvency II framework is based on a value-at-risk measure calibrated to a 99.5% confidence level over a one-year time horizon.

The SCR for non-life underwriting risk, using the Standard Formula, on a pre-diversified basis is €32.3m (2022: €32.1m), which is 49% (2022: 47%) of the Basic Solvency Capital Requirement ("BSCR") before diversification.

The non-life underwriting risk requirement includes premium and reserve risk, lapse risk and catastrophe risk.

Sensitivity tests are conducted to assess the variability of the non-life underwriting risk SCR.

The following sensitivities assess the impact on the non-life underwriting risk SCR and Solvency II own funds to adverse deviations in non-life best estimate liability ("BEL") net of reinsurance; the impact on own funds shown in the table relates to the adverse deviation of the BEL and corresponding increase of risk margin.

Adverse deviation of current net best estimate liabilities	Impact on SCR non-life underwriting risk	Impact on Own Funds (before tax):	Impact on SCR non-life underwriting risk	Impact on Own Funds (before tax):
€'m	2023 €'m	2023 €'m	2022 €'m	2022 €'m
10	+1	(11)	+1	(11)
20	+2	(21)	+3	(22)

The following sensitivities assess the impact of writing additional premium on the non-life underwriting risk SCR.

Additional amount of net premiums underwritten	Impact on SCR non-life Underwriting Risk	Impact on SCR non-life Underwriting Risk
€'m	2023 €'m	2022 €'m
5	+1	+1
10	+1	+1

The Company's Risk Assessment report identified natural catastrophe, terrorism, casualty and single-risk property lines as material non-life underwriting risks and monitors these risks in the Risk Committee and Board.

Natural catastrophe risk

Natural catastrophe risk is the risk that the aggregate losses from natural perils materially exceed the net premiums that are received to cover such risks. The Company considers both catastrophe losses due to a single large event and catastrophe losses that would occur from multiple (but potentially smaller) events in any year.

The Company measures exposure to natural catastrophe risk by peril-zone and at annual aggregate level. The overall approach to risk measurement has remained unchanged. The modelling of individual peril-zones and annual aggregation is reviewed and updated on a regular basis. The Company's RAF includes a key risk indicator for natural catastrophe risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company manages and mitigates natural catastrophe risk with monitoring of peril-zone and annual aggregate exposures, ongoing portfolio analysis, portfolio management, and external and internal reinsurance. For selected perils including peak risks, specific external reinsurance is purchased. The appropriateness of risk mitigation arrangements to the risk profile is reviewed on an ongoing basis by the Risk function and a dedicated reinsurance team within the Underwriting function.

The Company has world-wide exposures to natural catastrophe. Exposures have remained relatively stable during 2023. On a gross basis and net basis, the largest concentrations are to US windstorm, US hail storm, US, Australian and Canadian earthquake perils.

Stress and scenario testing for natural catastrophe risk is undertaken in the annual risk assessment and in the ORSA including scenarios where external reinsurers default on their obligations to the Company. The stress and scenario testing shows that the Company can absorb such losses and remain within stated risk appetite with respect to its solvency ratio.

Terrorism risk

The Company is exposed to terrorism risk through its property and casualty lines of business. Terrorism risk is the risk of financial losses due to acts of terrorism.

The Company measures exposure to terrorism risk with a per-event metric based on geographical accumulation. The overall approach to risk measurement has remained unchanged. The Company's RAF includes a key risk indicator for terrorism risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company manages and mitigates terrorism accumulation risk with close monitoring of per-event exposures by location, the participation in several national terrorism pools and internal and external reinsurance. The appropriateness of risk mitigation arrangements to the risk profile is reviewed on an ongoing basis by the Risk function and a dedicated reinsurance team within the Underwriting function.

The Company has world-wide exposures to terrorism with concentration of exposures in the US. The largest exposures net of reinsurance in 2023 are slightly higher compared to 2022 and remain well within risk appetite.

Stress and scenario testing for terrorism risk is undertaken in the annual risk assessment and considers exposure accumulation within a radius of 250 meters. The stress and scenario testing shows that the Company can absorb such losses and remain within stated risk appetite with respect to its solvency ratio.

Casualty risk

Casualty risk is the risk that the estimates of ultimate losses for casualty lines of business will prove to be too low, leading to the need for reserve strengthening.

The Company measures casualty reserve risk with metrics based on SCR and modelling in the Group internal capital model. The risk metric is based on the premium and reserve risk distribution in the capital model. The Company's RAF includes this risk metric as a key risk indicator for casualty risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company manages and mitigates reserve risk for casualty lines by following a disciplined underwriting process, applying prudent reserving policies for determining carried reserves and monitoring of per-risk and annual aggregate exposures. Casualty risk is also covered by internal and external reinsurance. The appropriateness of risk mitigation arrangements to the risk profile is reviewed on an ongoing basis by the Risk function.

The Company is mainly exposed to transactional liability and professional lines / directors' and officers' exposure in the US written via Managing General Agents ("MGAs"). Exposure has decreased during 2023 following a reduction in business written.

Stress and scenario testing for casualty risk is undertaken in the annual risk assessment and the ORSA and includes scenario with adverse development of reserves over a multi-year period and scenarios which test the

impact of an accumulation of large losses. The stress and scenario testing shows that the Company can absorb such losses and remain within stated risk appetite with respect to its solvency ratio.

Single-risk property lines

The Company is exposed to single-risk property lines through its aviation, energy onshore, energy offshore, and property lines of business. The main exposure comes from risks such as explosion, fire, machinery breakdown and business interruption which could lead to individual large losses.

The Company measures exposure to single-risk property lines with metrics based on single-risk exposures and geospatial accumulation. The overall approach to risk measurement of single-risk exposures has not changed during 2023. The Company's RAF includes a key risk indicator for single-risk property lines which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company manages and mitigates single-risk property lines with the setting of underwriting limits and regular monitoring of single-risk exposures. The risk of large losses is mitigated by external and internal reinsurance. External reinsurance includes specific single-risk protection. Internal reinsurance includes a stop-loss protection with PRCL which absorbs a significant amount of tail risk. The appropriateness of risk mitigation arrangements to the risk profile is reviewed on an ongoing basis by the Risk function.

The Company has an overall well-balanced portfolio. The largest exposures in the various property lines of business are comparable and there is no significant concentration to any one line of business or geographical region. The Company is exposed to both individual large losses and accumulation of several smaller losses across all property lines of business. The largest exposures in 2023 are stable compared to 2022.

Stress and scenario testing for single-risk property lines is undertaken in the annual risk assessment and the ORSA and includes scenario which test the impact of an accumulation of large losses. The stress and scenario testing shows that the Company can absorb such losses and remain within stated risk appetite with respect to its solvency ratio.

C.2. MARKET RISK

The SCR market risk, using the Standard Formula, on a pre-diversified basis is €15.4m (2022: €17.8m), which is 23% (2022: 26%) of the BSCR before diversification.

The decrease in market risk SCR is primarily as a result of:

- decreased currency risk due to lower USD exposures on the balance sheet; and
- decreased credit spread risk mainly due to shorter durations of corporate bonds.

The Company's Risk Assessment report identified currency, credit spread and inflation risk as material market risks and monitors these risks in the Risk Committee and the Board.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument or insurance liabilities will fluctuate because of changes in market interest rates.

The Company measures interest rate risk with the interest rate risk SCR as well as scenario-based metrics. The overall approach to risk measurement has remained unchanged. The Company's RAF includes a key risk indicator for interest rate risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company manages its interest rate risk by monitoring the duration of its fixed income portfolio relative to the duration of its insurance liabilities so that the economic value of changes in interest rates has offsetting effects on the Company's assets and liabilities and with interest rate risk sensitivities of its investments. The Company does not have specific risk mitigation arrangements such as interest rate hedges.

The Company is mainly exposed to rising EUR and USD interest rates; exposure to movements in other interest rates is significantly smaller. The exposure both to EUR and USD is mainly driven by the Company's asset holdings.

Exposures can vary over time as assets and liabilities change in line with investment and business developments. During 2023, exposure has increased while remaining within the approved risk limits.

Stress and scenario testing for interest rate risk is undertaken in the annual risk assessment and the ORSA which includes stand-alone sensitivities and a variety of short-term and long-term combination scenarios which include losses due to other market or insurance risks in addition to losses due to changes in interest rates. The stress and scenario testing shows that the Company can absorb such losses and remain within stated risk appetite with respect to its solvency ratio.

Currency risk

Currency risk is the risk that the fair value or future cash flows of assets and liabilities will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from transactions and recognised monetary assets and liabilities which are denominated in a currency other than the functional currency of the Company.

The Company measures exposure to currency risk with scenario-based metrics on its net asset value position and with the currency SCR. The overall approach to risk measurement has remained unchanged. The Company's RAF includes a key risk indicator for currency risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company reviews and manages its net asset value position with a number of formal controls including Treasury review of the net asset value.

The Company's main exposure is to USD. Exposures can vary over time as assets and liabilities change in line with investment and business developments. Exposures have slightly decreased during 2023 due to lower USD exposure.

Stress and scenario testing for currency risk is undertaken in the annual risk assessment and the ORSA and includes the impact of currency fluctuations on the Company's SCR. The stress and scenario testing shows that the Company's solvency ratio is mainly exposed to a depreciation of EUR against other major currencies, due to carrying significant liabilities in currencies other than EUR, and that it can absorb such scenarios and remain within stated risk appetite. The exposure to a depreciation of EUR holds despite the positive impact on Own Funds in such a scenario.

Assuming all other variables are held constant, as at the reporting date, a 10% adverse movement in the value of the Euro currency against all other currencies which comprise the Company's Solvency II Own Funds would have resulted in a €3.9 million (2022: €5.2 million) decrease in Own Funds.

Credit spread risk

Credit spread risk is the risk of a significant widening of credit spreads resulting in realised or unrealised investment losses on the Company's standard fixed income securities which may result in economic losses to the Company.

The Company measures credit spread risk with metrics based on credit quality and duration of fixed income instruments and with metrics based on the impact on market value due to changes in market credit spreads. The overall approach to risk measurement has remained unchanged in 2023. The Company's RAF includes a key risk indicator for credit spread risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

Credit spread risk is managed and mitigated with limits on credit quality and concentration to any single name or sector. Credit spread risk can change from period to period depending on market conditions and asset-liability management actions.

The Company's key exposures are corporate bonds most of which are investment grade (mostly A or BBB) with concentration in the Financial Industry. In 2023, exposure to credit spread risk has slightly decreased due to reduced duration of the credit spread sensitive portfolio.

Stress and scenario testing for credit spread risk is undertaken in the annual risk assessment and the ORSA and includes stand-alone sensitivities and a variety of short-term and long-term combination scenarios which include losses due to other market or insurance risks in addition to losses due to changes in credit spreads. The stress and

scenario testing shows that the Company can absorb such scenarios and remain within stated risk appetite with respect to its solvency ratio.

Inflation risk

Inflation risk is the risk of a reduction in purchasing power per unit of money overall or in respect of specific products or services resulting in increased claims and expenses and potentially in monetary action (changes in interest rates) resulting in realised and unrealised gains and losses on the Company's fixed income portfolio.

The Company measures claims and expense inflation risk with a scenario-based metric and inflation risk in combination with interest rate risk with stress and scenario testing in the annual Risk Assessment report and ORSA. The overall approach to risk measurement has remained unchanged in 2023. The Company's RAF includes a monitoring metric for claims and expense inflation risk which is monitored on a quarterly basis in the Risk Committee and Board.

The impact of claims inflation is mitigated by external and internal reinsurance. The appropriateness of risk mitigation arrangements to the risk profile is reviewed on an ongoing basis by the Risk function.

Claims and expense inflation risk arises mostly in respect of claims payments. In 2023, exposure to inflation risk remained stable. Claims and expense inflation risk arises in the currencies of the underlying liabilities.

Stress and scenario testing for inflation risk is undertaken in the annual risk assessment and the ORSA and includes stand-alone inflation and combination scenarios. The stress and scenario testing shows that the Company can absorb such scenarios and remain within stated risk appetite with respect to its solvency ratio.

Description of how assets have been invested in accordance with the 'Prudent Person Principle'

The Company employs a prudent investment philosophy. It maintains a high quality, well-balanced and liquid portfolio having a total return investment objective, achieved through a combination of optimising current investment income and pursuing capital appreciation. The Company's total invested assets were €232.4 million at 31 December 2023 (2022: €178.8 million); refer to section D.1. of this report for a breakdown by asset type. From a risk management perspective, the Company allocates its invested assets into two categories: liability funds and capital funds.

For the Company's portfolio, diversification of risks contributes to achieving the risk and return objectives of the Company. The Company's investment policy distinguishes between liquid, high quality assets that support the Company's liabilities, and the more diversified, higher risk asset classes that may make up a portion of the Company's capital funds. While there will be years where investment risks achieve less than the risk-free rate of return, or potentially even negative results, the Company believes the rewards for assuming these risks in a disciplined and measured way will produce a positive excess return to the Company over time. Additionally, since investment risks are not fully correlated with the Company's insurance risks, this increases the overall diversification of the Company's total risk portfolio.

The Company's investments are managed by PartnerRe Asset Management Corporation ("PRAM") subject to a management agreement. The allocation of the Company's investments are subject to the asset allocation plan set by the Board. Furthermore, PRAM is required to adhere to investment guidelines approved by the Board as to minimum ratings and issuer and sector concentration limitations.

Liability funds represent invested assets supporting the net insurance liabilities, and are invested primarily in investment grade fixed income securities and cash and cash equivalents. The preservation of liquidity and protection of capital are the primary investment objectives for these assets.

Liability funds are invested in a way that generally matches them to the corresponding liabilities (referred to as asset-liability matching) in terms of both duration and major currency composition to provide the Company with a natural hedge against changes in interest and foreign exchange rates. In addition, the Company may use certain approved derivatives to further protect against changes in interest and foreign exchange rates.

Capital funds represents capital of the Company in excess of liability funds and may be invested in a diversified portfolio with the objective of maximising investment return, subject to prudent risk constraints. Capital funds may

contain asset classes typically viewed as offering a higher risk and higher return profile. Capital funds may be invested in investment grade fixed income securities. The Company's investment strategy allows for the use of derivative instruments, subject to strict limitations and for the purpose of managing and hedging currency risk, market exposure and portfolio duration, hedging certain investments, mitigating the risk associated with underwriting operations, or enhancing investment performance that would be allowed under the Company's investment policy if implemented in other ways.

The Company through its management agreement, its investment risk policy, asset allocation plan and investment guidelines ensures that management and reporting of its investment portfolio is suitable for the nature and size of the risks of the Company and are subject to portfolio diversification guidelines which include issuer and sector concentration limitations. Processes and procedures ensure that the Company can properly identify, measure, monitor, manage, control and report on its portfolio.

Quarterly reporting is presented to the Risk and the Audit Committees of the Board. If a new asset class is proposed, the Company assesses the change including the potential impact on credit quality, liquidity and capital requirements.

In respect of liquidity, the Company's fixed income portfolio is primarily invested in high quality, investment grade securities which are characterised by relatively low levels of credit risk and relatively high liquidity. As set out in C.4, the Company ensures it holds sufficient liquid securities to meet excess liquidity after stress and downgrade requirements of its RAF.

In respect to capital funds and if permitted under the Company's asset allocation plan, and in which case subject to the set out limits therein, the Company may invest a portion of its portfolio in fixed income securities that are below investment grade as well as other interest paying investments such as fixed income type mutual funds, notes receivable, loans receivable, private placement bond investments, derivative exposure assumed and other specialty asset classes. These securities generally pay a higher rate of interest and have a higher degree of credit or default risk. These securities may also be less liquid in times of economic weakness or market disruptions.

C.3. CREDIT RISK

Credit risk is referred to as counterparty default risk in the SCR calculation. The SCR for counterparty default risk, using the Standard Formula, on a pre-diversified basis is €233m (2022: €236m), which is 11% (2022: 11%) of the BSCR before diversification.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Ownership of financial assets involves the risk that counterparties may be unable to meet the terms of their agreements.

The Company measures credit risk with metrics based on SCR, credit ratings, single-counterparty exposures and the solvency ratio of Group-internal counterparties. The overall approach to risk measurement has remained unchanged. The Company's RAF includes key risk indicators for credit risk with internal and external reinsurers which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company's exposure to credit risk arises mainly from cash and cash equivalents deposited with banks, investments in fixed income and other financial securities, insurance balances recoverable on ceded insurance and receivables from MGAs. The main exposures are related to reinsurance agreements with related companies of the Group, rated A+.

The Company uses reinsurance agreements to reduce its exposure on certain underwriting risks assumed and to mitigate the effect of any single major event or the frequency of medium-sized events, thereby exposing the Company to credit risk with reinsurers. Reinsurers must be approved based on their financial condition and business practices, with stability, solvency and credit ratings being important criteria. Limits per reinsurer are put in place and monitored to mitigate counterparty credit risk. The Company manages its credit exposure to reinsurers by generally selecting reinsurers which have a credit rating of A- or higher. In certain cases where an otherwise suitable reinsurer has a credit rating lower than A-, the Company generally requires the posting of collateral and letters of credit as a condition to it entering into a reinsurance agreement.

Credit risk related to cash, cash equivalents and investments is primarily mitigated by investing only in counterparties with strong credit ratings and managing concentration risk by limiting the aggregate exposure to any individual counterparty through the use of appropriate limits.

The creditworthiness of counterparties is monitored on an on-going basis. The Company uses, where available, rating information provided by S&P and A.M. Best to ensure a consistent view on the financial condition of external parties.

Stress and scenario testing for credit risk is undertaken in the annual risk assessment and the ORSA. The stress and scenario testing shows that the Company relies on related companies of the Group remaining going concern. The Company considers residual credit risk with related companies of the Group as remote.

C.4. LIQUIDITY RISK

Liquidity risk is the risk of not being able to meet financial obligations as and when they fall due, including obligations to cedants, internal counterparties and other third parties.

The Company measures liquidity risks by evaluating a pre-defined liquidity crisis scenario unfolding over a time horizon of one year and comprising of a combination of a financial market crisis, insurance losses with rapid pay-out and downgrade. The approach to risk measurement was unchanged during 2023. The Company's RAF includes a key risk indicator for liquidity risk which is monitored in respect of compliance with stated risk appetite on a quarterly basis in the Risk Committee and Board.

The Company mitigates liquidity risk by holding a large part of its investments in investment grade standard fixed income securities and other liquid instruments.

The Company is exposed to liquidity risk mainly through claims arising from its insurance contracts and a difference in timing between claims payments and recoveries from reinsurance ceded. Liquidity risk may also arise from a decline in disposal value of the Company's assets in financial market crises, from collateral calls on collateralized business and from a reduction in liquidity inflows. Liquidity risk has remained within approved risk appetite during 2023.

Stress and scenario testing for liquidity risk is undertaken in the quarterly liquidity stress test as set out above. The stress and scenario testing shows that the Company remains in a positive excess liquidity position after the scenario considered in the liquidity stress test.

Expected Profit Included in Future Premium

The Expected Profit Included in Future Premium ("EPIFP") is €30.7 million (2022: €35.4 million). The EPIFP represents the difference between the premiums from future exposure arising from contracts that the Company is obligated to as at 31 December 2023 and the expected acquisition costs, losses and expenses relating to these premiums. A lapse rate was assumed on in-force contracts relating to future additional premium and on premium relating to business bound but not yet incepted at the closing date. The calculation was discounted using Solvency II yield curves.

The EPIFP by line of business was as follows as at the current and prior period year ends:

Line of business	2023	2022
	€'000	€'000
Marine, aviation and transport	1,703	2,850
Fire and other damage to property	20,704	18,334
General liability	8,321	14,185
Credit and suretyship	—	62
Total	30,728	35,431

C.5. OPERATIONAL RISK

Operational risks include, but are not limited to, failures or weaknesses in financial reporting and controls, regulatory non-compliance, fraud, breach of information technology and data privacy security, disaster recovery planning and reliance on third party vendors.

The Company categorises its operational risks as follows: cyber risk and data protection, business disruption, process and execution management, outsourcing, legal and compliance, fraud, human resources risk, and regulatory risk. The Company also monitors branch matters, strategic and emerging risks which may relate to operational risks.

Cyber risk and data protection risk relates to the potential of a successful cyber-attack with significant business impact which could lead to financial losses and operational disruption. Business disruption risk relates to business continuity and emergency management. Process and execution management risk relates to underwriting and reporting processes. Outsourcing risk is financial, operational, regulatory or reputational risk related to the outsourcing of processes or services within PartnerRe Group or to third parties. Legal and compliance risks relate to regulatory obligations and legal risks in relation to the Company's business activities. Fraud risk relates to intentionally deceptive actions potentially resulting in financial statement fraud, misappropriation of assets, claims or tax fraud. Human resources risk relates to the risk of strategic or financial underachievement due to a lack of critical skills. Regulatory risk relates to financial, operational, and reputational risk related to the changes in laws or regulations.

The Company manages and mitigates operational risks through policies and guidelines setting out appropriate procedures and internal controls and the periodic assessment of adherence to these procedures and controls by Internal Audit. Operational risk is monitored and reported in standardised form to management, the Risk Committee and the Board. Matters are escalated to the Board as required and mitigating actions are assigned to bring elevated risks back within tolerance.

There were no material weaknesses identified in any of the operational risk categories and no material changes to the operational risk profile of the Company.

C.6. OTHER MATERIAL RISKS

Strategic risks

Strategic risks are discussed with the General Manager, the Legal Entity Management Team, the Board and the Group and include the direction and governance of the Company as well as its response to external factors faced by the insurance industry such as changes in regulation, competitive structure and macroeconomic, legal and social trends. Strategic risks are managed by strong governance procedures, including a robust system of processes and internal controls.

Strategic risks are included in the Company's risk assessment process and are monitored on a quarterly basis with onward reporting as needed to the Risk Committee and the Board.

The Company's Risk Assessment report has identified Group risks as material strategic risk. Brexit was removed from the risk universe. The risk category climate change was extended to cover all sustainability risks (environmental, social, governance).

Group risks

The Company is exposed to Group risks of financial and operational nature. Financial risks relate mostly to the Company's reliance on Group affiliates for reinsurance which implies counterparty and liquidity risk and are assessed as low due to the high credit rating and solvency ratios of the relevant affiliate companies. Group risks of operational nature relate to the embedding of Company processes in Group processes and the provision of services by affiliate companies.

Environmental, Social and Governance ("ESG") risks

ESG risks are risks related to environmental, social and governance aspects that could have potential or actual negative impacts on the financial position, performance or reputation of the Company. Relevant ESG sub-risks for the Company are climate change, liability risks, transition risk on investments, and operational and reputational risks.

The Company is exposed to increased tropical cyclone activity on its North American property and specialty lines portfolio. With current knowledge, the Company is not considered to be significantly exposed to changes in severity or frequency of other natural catastrophe perils such as flood.

D&O business could potentially be exposed to ESG related liability claims. So far, very few such claims have been observed.

Investments are mostly exposed to transition risks related to ESG or climate change-related policy actions and changing consumer and investor sentiment. These risks can be systemic (affecting whole sectors or investment classes) or idiosyncratic (affecting individual investments). The systemic risk is of greater importance for the Company while the idiosyncratic risk is largely mitigated by limits on individual exposures and diversification.

Operational and reputational risk can occur directly through company actions, including employee actions, (e.g. non-compliance with regulation or violation of ESG principles) or indirectly through the Company's business and investment choices. These risks are considered to be effectively mitigated by the ESG-related activities, policy and process updates and controls implemented in recent years.

Reputational risks

Reputational risk is the risk of potential loss through deterioration of the Company's reputation or standing due to a negative perception among customers, counterparties, shareholders or supervisory authorities. Reputational impacts tend to be an outcome of other risk types materialising; therefore, managing each type of risk serves to manage reputational risk.

Reputational risks are included in the Company's risk assessment process and are monitored on a quarterly basis with onward reporting as needed to the Risk Committee and the Board. No significant reputational risks for the Company have been identified.

Emerging risks

Emerging risks are subject to the risk identification, assessment, monitoring and reporting as set out in section B.3 in this report.

C.7. ANY OTHER INFORMATION

No other material change over the period.

D. VALUATION FOR SOLVENCY PURPOSES

D.1. ASSETS

	2023			2022		
	Solvency II Valuation €'000	Irish GAAP Valuation €'000	Variance €'000	Solvency II Valuation €'000	Irish GAAP Valuation €'000	Variance €'000
Fixed income securities	209,436	209,436	—	164,706	164,706	—
Cash and cash equivalents	19,058	19,058	—	12,763	12,763	—
Reinsurance recoverable	330,375	547,107	(216,732)	327,480	582,425	(254,945)
Reinsurance receivables	11,392	11,392	—	7,551	7,551	—
Deferred acquisition costs	—	54,905	(54,905)	—	67,697	(67,697)
Insurance and intermediaries receivable	13,185	13,185	—	14,294	14,294	—
Receivables (trade, not insurance)	2,469	2,469	—	3,437	3,437	—
Deferred tax asset	935	959	(24)	2,959	2,805	154
Other assets	3,990	3,990	—	1,325	1,314	11
Total	590,840	862,501	(271,661)	534,515	856,992	(322,477)

Fixed income securities

Fixed income securities are generally priced by independent pricing services and brokers. Each pricing source will have its own proprietary method to determine fair value which will incorporate information such as credit spreads, interest rate data, market news and an option adjusted spread. The Company will classify these assets as Quoted Market Price in Active Markets for Similar Assets ("QMPS") for valuation purposes under Solvency II. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. There is no variance in valuation when compared to the Irish GAAP Balance Sheet.

Cash and cash equivalents

Cash and cash equivalents are carried at face value on the Irish GAAP balance sheet as best representing their fair value. Since the underlying currency of the cash is freely tradable the Company considers them to be classified as alternative valuation method for valuation purposes under Solvency II. There is no variance in the valuation when compared to the Irish GAAP Balance Sheet.

Reinsurance recoverables

Reinsurance recoverables (reinsurance share of technical provisions) reflect the estimated amounts which are recoverable under reinsurance contracts. Reinsurance recoverables on the Solvency II balance sheet are calculated in a manner consistent with the best estimate liabilities.

The projection of reinsurance recoverables includes future cash flows relating to each of the claims provision and premium provision, discounted using prescribed EIOPA risk-free yield curves for Solvency II reporting. An ENIDs (Events not in Data) loading is applied, in addition to calculating a counterparty default adjustment for ceded loss reserves in order to take account of the possible shortfall on expected recovery from reinsurers.

Reinsurance receivables

Reinsurance receivables are amounts owed under reinsurance contracts and are valued at their account balance which equates to fair value due to the short-term nature of the balance. There is no variance in the valuation when compared to the Irish GAAP Balance Sheet.

Deferred acquisition costs

Acquisition costs are charged to expenses as the related premium is earned, with the unearned portion recognised as an asset on the Irish GAAP Balance Sheet. Deferred acquisition costs are not recognised on the Solvency II Balance Sheet as they do not have a future cash flow.

Insurance and intermediaries receivables

Insurance and intermediaries receivables are amounts owed under insurance and assumed reinsurance contracts and are valued at their account balance which equates to fair value due to the short-term nature of the balances. There is no variance in valuation when compared to the Irish GAAP Balance Sheet.

Receivables (trade, not insurance)

Receivables (trade, not insurance) are amounts owed by Group companies, business partners etc., and are generally valued at their account balance. Most balances are current items and are collected in a short timeframe so the face value is deemed equal to fair value.

Deferred tax asset

Deferred tax assets are valued based on the tax impact of the temporary difference between the values ascribed to assets recognised and valued in accordance with Solvency II rules and the values ascribed to assets as recognised and valued for tax purposes. Deferred tax assets are also recognised from the carry forward of unused tax credits and the carry forward of unused tax losses.

Deferred tax assets are recognised only to the extent that it is probable that future tax profit will be available against which the deferred tax asset can be utilised, taking into account any legal or regulatory requirement on time limits relating to the carry forward of unused tax losses or credits. Deferred tax assets are not discounted. The difference between the values of the Solvency II Balance Sheet and the Irish GAAP Balance Sheet are due to the tax impact of valuation adjustments to other assets on the balance sheet.

D.2. TECHNICAL PROVISIONS

Under Solvency II, the Technical Provisions ("TPs") are determined as a discounted Best Estimate Liability ("BEL") augmented by a risk margin ("RM"). The BEL includes claims and premium provisions and is defined as the mean of the full range of possible future outcomes on a discounted cash flow basis, taking into account the time value of money, and with all existing contracts being valued, whether they have already incepted or are yet to incept. The RM is a component of the TPs representing the current values of all costs-of-capital that will be determined yearly until the existing liabilities are fully concluded.

In valuing the Company's technical provisions, none of the following have been applied:

- The matching adjustment referred to in Article 77b of Directive 2009/138/EC (the Directive)
- The volatility adjustment referred to in Article 77d of the Directive
- The transitional risk-free interest rate-term structure referred to in Article 308c of the Directive
- The transitional deduction referred to in Article 308d of the Directive.

Technical Provisions by Line of Business

The following table outlines the Solvency II TPs by line of business, as at the end of the current and prior financial years:

	Claims Provisions	Premium Provisions	Recoverables from Reinsurance contracts	Risk Margin	Total Technical Provisions net of Recoverables
2023					
Line of Business	€'000	€'000	€'000	€'000	€'000
Marine, aviation and transport	53,325	2,015	(47,252)	1,285	9,373
Fire and other damage to property	96,788	(4,309)	(82,298)	2,650	12,831
General liability	160,599	63,494	(200,443)	4,658	28,308
Credit and suretyship	404	51	(382)	27	100
Total	311,116	61,251	(330,375)	8,620	50,612

	Claim Provision	Premium Provision	Recoverables from Reinsurance contracts	Risk Margin	Total Technical Provisions net of Recoverables
2022					
Line of Business	€'000	€'000	€'000	€'000	€'000
Marine, aviation and transport	58,842	486	(52,125)	1,379	8,582
Fire and other damage to property	91,775	(4,441)	(75,789)	2,242	13,787
General liability	158,721	70,455	(199,488)	6,590	36,278
Credit and suretyship	109	(17)	(78)	18	32
Total	309,447	66,483	(327,480)	10,229	58,679

Best Estimate Liability

The BEL is determined gross of the amounts recoverable from retrocession contracts, which are held separately on the asset side of the Solvency II balance sheet. The valuations of best estimate provision for claims outstanding and for unearned premium are carried out separately. Projections are performed separately for the inwards and ceded business but the bases, methodology and assumptions are considered consistently.

All data is converted to USD before modelling, but the location in which the business was written and original currency of the contracts is considered for the purpose of granularity and discounting. In calculating the BEL, risks are grouped homogeneously and considered by region at Solvency II line of business, as defined under Solvency II. The calculation accounts for the lifetime of existing obligations within contract boundaries. There is no deviation in methodology between lines of business.

The BEL captures the best estimation of future cash flows relating to existing obligations for each of the claims provision and premium provision independently. Premium, losses, expenses and costs are considered separately and all cash flows are discounted using prescribed EIOPA risk-free yield curves for Solvency II reporting.

In accordance with Solvency II technical specifications, the future administrative expenses, investment management expenses and claims management expenses expected to be incurred in the future related to business bound as of the valuation date have been included. The expenses were estimated based on an analysis of the planned 2024 expenses. The expenses estimated which relate to existing business, including business incepted post-technical cut-off date, and bound but not incepted ("BBNI") business were allocated between the claims and premium provision.

The existing data sets used to estimate the BEL will not be complete as they only contain events which have already been experienced in the time frame covered by the data. An events not in data ("ENID") loading is applied, which represents the gap between the existing data set and a complete data set.

Risk Margin

The RM is calculated by determining the cost of providing an amount of Eligible Own Funds equal to the SCR necessary to support the insurance obligations over the lifetime thereof. The rate used in the determination of the cost of providing that amount of Eligible Own Funds is called cost-of-capital rate and equals 6%.

The RM is first calculated for the whole business, allowing for diversification between lines of business. In a second step, the RM is allocated to lines of business. The allocation reflects the contributions of the lines of business to the SCR of the reference undertaking over the lifetime of the obligations.

The RM is considered on a standalone basis such that the contribution of a line of business is calculated under the assumption that the other business does not exist.

Recoverables from reinsurance contracts

The projection of reinsurance recoverables is performed separately to the projection of the inwards business. As most of the ceded business is predominantly proportional the bases, methodology and assumptions are consistent with those for inwards business.

An additional adjustment is made by calculating a counterparty default adjustment for ceded loss reserves in order to take account of the possible shortfall on expected recovery from reinsurers.

Material Changes to Assumptions during 2023

There have been no material changes to assumptions underlying the BEL calculation during 2023.

Level of uncertainty

The Irish GAAP reserves calculated by the Company are estimations, based on various sources of information and the use of actuarial techniques. Additional assumptions guide the adjustments to calculate the Solvency II BEL from the Irish GAAP reserves, such as priced profitability of unearned premium. The ultimate outcome of these estimations may materially differ from what is selected for the Solvency II BEL. The deviations compared to current BEL can relate, amongst others, to:

- the level of future inflation compared to current expectations;
- the evolution in case law for future claims following a change in court awards;
- the current assumptions about market environment and pricing conditions happen to be wrong; and
- future claim activity differs from what was anticipated, due to the nature of the business covered.

Comparison with Irish GAAP reporting

The main differences between the Irish GAAP and Solvency II valuation bases are summarised as follows:

- Irish GAAP reserves includes an explicit margin for uncertainty which are not included in the Solvency II TPs. Conversely, Solvency II TPs include the risk margin which is not included in the Irish GAAP reserves.
- Irish GAAP reserves are calculated on an undiscounted basis, whereas the cash-flows used to determine the Solvency II TPs are discounted using risk-free rates provided by EIOPA.
- Irish GAAP reserves considers actual historical experience to date. Under Solvency II, we need to allow for possibilities beyond this to consider the full range of possible future outcomes, including experience which may not be captured within the historical data.
- Irish GAAP unearned premium reserves are replaced with a best estimate of the premium provision which takes into account the expected cost of claims and expenses relating to the unearned period as well as expected future premium payable (net of acquisition cost and commissions); this is likely to produce a

Solvency II premium provision that is less than that under Irish GAAP. The premium provision also considers BBNi contracts, which is not required in the Irish GAAP calculation.

The following table shows the difference between the Gross Irish GAAP reserves in the Irish GAAP financial statements and the technical provisions under Solvency II:

2023	Best Estimate Liability	Risk Margin	Solvency II Technical Provision	Gross Irish GAAP Valuation	Difference
	€'000	€'000	€'000	€'000	€'000
Marine, aviation and transport insurance	55,341	1,285	56,625	70,139	(13,514)
Fire and other damage to property insurance	92,479	2,650	95,130	154,919	(59,789)
General liability insurance	224,093	4,659	228,752	390,657	(161,905)
Credit and suretyship	454	27	481	481	—
Total	372,367	8,621	380,988	616,196	(235,208)

2022	Best Estimate Liability	Risk Margin	Solvency II Technical Provision	Gross Irish GAAP Valuation	Difference
Line of Business	€'000	€'000	€'000	€'000	€'000
Marine, aviation and transport insurance	59,328	1,379	60,707	82,356	(21,649)
Fire and other damage to property insurance	87,334	2,242	89,576	139,269	(49,693)
General liability insurance	229,177	6,590	235,767	423,351	(187,584)
Credit and suretyship	91	18	109	301	(192)
Total	375,930	10,229	386,159	645,277	(259,118)

Simplifications used in the calculation of the technical provisions

The following simplifications have been used in the calculation of TPs:

- A percentage approach has been adopted to quantify reinsurance recoverables for non-proportional treaties;
- The Company's BEL includes a provision for Events Not In Data (ENIDs) which is assumed to have the same cash-flow profile of other claims for discounting purposes; and
- Future SCRs used to calculate the risk margin are projected using a run-off pattern approach which is applied to the SCR at time 0.

D.3. OTHER LIABILITIES

This section outlines the valuation basis and comparison for other liabilities, excluding TPs, as at the end of the current and prior financial years. For reconciliation purposes, the categories listed below for the Irish GAAP balance sheet have been aligned to those of the Solvency II balance sheet.

	2023			2022		
	Solvency II Valuation	Irish GAAP Valuation	Variance	Solvency II Valuation	Irish GAAP Valuation	Variance
	€'000	€'000	€'000	€'000	€'000	€'000
Reinsurance payables	33,152	33,152	—	12,081	12,081	—
Insurance and intermediaries payable	21,311	21,311	—	3,700	3,700	—
Payables (trade, not insurance)	4,865	4,865	—	4,125	4,125	—
Deferred tax liabilities	638	—	638	—	—	—
Other liabilities	—	50,783	(50,783)	1	62,779	(62,778)
Total	59,966	110,111	(50,145)	19,907	82,685	(62,778)

Reinsurance payables

Reinsurance payables are amounts due under reinsurance contracts and are valued at their account balance which equates to fair value due to the short-term nature of the balances. There is no variance in valuation when compared to the Irish GAAP Balance Sheet.

Insurance and intermediaries payable

Insurance and intermediaries payable are amounts due under insurance and assumed reinsurance contracts and are valued at their account balance which equates to fair value due to the short-term nature of the balances. There is no variance in valuation when compared to the Irish GAAP Balance Sheet.

Payables (trade, not insurance)

Payables (trade, not insurance) are amounts due to employees, Group companies, business partners, etc., and are generally valued at their account balances. Most balances are current items and are collected in a short timeframe, so the face value is deemed to equal fair value. There is no variance in valuation when compared to the Irish GAAP Balance Sheet.

Deferred tax liabilities

Deferred tax liabilities are valued based on the tax impact of the temporary difference between the values ascribed to liabilities recognised and valued in accordance with Solvency II rules and the values ascribed to liabilities as recognised and valued for tax purposes.

Deferred tax liabilities are not discounted. The difference between the values of the Solvency II balance sheet deferred tax liabilities and the Irish GAAP values are due to the tax impact of valuation adjustments to other liabilities on the balance sheet.

Other liabilities

Other liabilities relate to reinsurance commissions/ceded deferred acquisition costs, which are charged to profit or loss as the related ceded premium is earned, with the unearned portion recognised as a liability on the Irish GAAP Balance Sheet. Ceded deferred acquisition costs are not recognised on the Solvency II Balance Sheet as they do not have a future cash flow.

D.4. ALTERNATIVE METHODS FOR VALUATION

In certain circumstances for some assets and liabilities an alternative method of valuation is used to determine the value. These methods are applied where the valuation is not possible to determine using the default method i.e. QMP or QMPS. All valuation methods applied have been explained within the relevant sections in D.1. Assets and D.3. Other liabilities.

D.5. ANY OTHER INFORMATION

There is no other material information regarding the valuation of assets and liabilities for solvency purposes.

E. CAPITAL MANAGEMENT

E.1. OWN FUNDS

Nature of capital

The capital (Solvency II Own Funds) of the Company consists of ordinary shares, capital contributions from the Group, retained earnings and reserves.

The ordinary shares issued to PartnerRe Holdings Europe Limited ("PRHEL"), fulfil the criteria in that they:

- Are issued directly by the Company with the prior approval of its shareholders; and
- Entitle the owner to claim on the residual assets of the Company in the event of a winding up.

The various capital contributions from other Group companies are irrevocable transfers from the Group to the Company and, as such, do not impose any obligations on the Company. Therefore, all of the capital of the Company is classified as Tier 1 Basic Own Funds in the context of Solvency II, except for net deferred tax assets which are classified as Tier 3 capital, which cannot be used to cover the Minimum Capital Requirement ("MCR"). There are currently no ancillary Own Fund items. There are no restricted Tier 1 or Tier 2 items included in Solvency II Own Funds. The Company has not applied the transitional arrangements referred to in Articles 308b(9) and 308b(10) of the Directive.

The following table shows a breakdown of the total Solvency II Own Funds as at the end of the current and prior financial years:

	Tier 1 - unrestricted funds €'000	Tier 3 €'000	Total €'000
2023			
Ordinary share capital	2,249	—	2,249
Reconciliation reserve	15,878	—	15,878
Net deferred tax assets	—	297	297
Other Own Funds approved by the supervisory authority	131,463	—	131,463
Total Solvency II Own Funds	149,590	297	149,887
Total eligible own funds to meet SCR	149,590	297	149,887
Total eligible own funds to meet the MCR	149,590	—	149,590

	Tier 1 - unrestricted funds €'000	Tier 3 €'000	Total €'000
2022			
Ordinary share capital	2,249	—	2,249
Reconciliation reserve	(8,222)	—	(8,222)
Net deferred tax assets	—	2,959	2,959
Other Own Funds approved by the supervisory authority	131,463	—	131,463
Total Solvency II Own Funds	125,490	2,959	128,449
Total eligible own funds to meet SCR	125,490	2,959	128,449
Total eligible own funds to meet the MCR	125,490	—	125,490

The reconciliation reserve is made up of Irish GAAP retained earnings, Irish GAAP currency translation reserve and the valuation differences between Irish GAAP and Solvency II. The movement in the reconciliation reserve during the year was a result of the loss recognised during the year, the foreign exchange gains recognised in the currency translation reserve and the movement in Solvency II valuation differences.

The other own funds approved by the supervisory authority are equal to the additional paid-in capital of the Company.

The Company did not make any dividend payments to its shareholder in 2023 or 2022.

Capital Management

The Company's objectives when managing capital are:

- to safeguard the Company's ability to continue as a strong going concern so that it can continue to provide returns for its stakeholders and pay insurance losses reported by policyholders;
- to ensure that the Company is a well capitalised risk insurer for its policyholders; and
- to comply with the insurance capital requirements required by the CBI.

The capital position of the Company is monitored on a quarterly basis jointly by the Head of Finance and the CRO and is reported to the Risk and Audit Committees as well as the Board, on a quarterly basis.

Any dividend payments must be approved by the Board and will take account of the short-term and long-term interests of shareholders as well as maintaining a balance between the interests of shareholders and other key stakeholders, namely policyholders and regulators.

In particular, no distribution of dividends will compromise the ability of the Company to meet its current or future commitments to policyholders. In the context of Solvency II, no distribution of dividends shall lead to the Company failing to comply with the Solvency Capital Requirement (or such higher capital requirement as the Board may determine, from time to time).

The time horizon used for business planning is three years, which aligns with the ORSA and the business plan.

Going Concern

The SFCR has been prepared on the going concern basis. The Directors have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from the date on which the SFCR is approved. The Directors' basis for this assessment includes the Company's capital position, the Company's liquidity, the level of reinsurance in place and the credit quality of the Company's counterparties.

Reconciliation of Solvency II Own Funds to Irish GAAP Shareholders' Equity

The following table compares shareholders' equity from the Company's Irish GAAP financial statements to the Solvency II Own Funds as at the end of the current and prior financial years:

	2023	2022
	€'000	€'000
Irish GAAP Shareholders' Equity	145,376	129,029
Net deferred acquisition costs	(4,122)	(4,919)
Revaluation of net non-life technical provisions	9,277	4,196
Revaluation of other assets and liabilities	(644)	143
Solvency II Own Funds	149,887	128,449

The differences between the Company's shareholders' equity and Solvency II own funds relate to valuation of the net technical provisions, the removal of deferred acquisition costs and the revaluation of the net deferred tax asset.

See section D.2 of this report for a detailed explanation of the differences in valuation of the net non-life TPs.

A detailed line-by-line Solvency II balance sheet is provided in the QRT number SE.02.01.02 in the annex to this report.

E.2. SOLVENCY CAPITAL REQUIREMENT AND MINIMUM CAPITAL REQUIREMENT

The amount of the Company's SCR and MCR at the end of the current and prior financial years are set out below.

The table below shows the components of the SCR (using the Standard Formula) as at the end of the current and prior financial years:

	2023 €'000	2022 €'000
Market risk	15,350	17,754
Counterparty default risk	18,002	18,919
Non-life underwriting risk	32,334	32,110
Sum of risk components	65,686	68,783
Diversification effects	(14,956)	(16,203)
BSCR	50,730	52,580
Adjustment for LACDT	(638)	—
SCR operational risk	11,172	11,278
SCR	61,264	63,858
Solvency II Own Funds	149,887	128,449
Ratio of Eligible Own Funds to SCR	245 %	201 %

The increase in the Ratio of Eligible Own Funds to SCR is due to an overall increase in Own Funds year on year.

The SCR has decreased by €2.6 million since 2022 predominantly as a result of:

- a decrease in the market risk charge mainly driven by a reduction to U.S. dollar currency exposure;
- a decrease in counterparty default risk charge due to lower insurance and trade receivables; and
- an increase in the benefit of loss absorbing capacity of deferred tax as a result of the deferred tax liability on the Solvency II balance sheet.

The SCR calculation is based on the aggregation of the different sub-modules of the SCR that have been calculated by the various departments responsible.

Risk-mitigation techniques (such as reinsurance) are taken into account for the calculation of the different sub-modules. The SCR of the different sub-modules are net of risk-mitigation techniques and the impact of these techniques from a SCR point of view is dealt with in the Counterparty risk module.

The Company applies two simplifications within the counterparty risk module set out in the Delegated Regulation (articles 107 and 112). These simplifications have no material impact on the SCR. The Company also applies a simplification in respect of the evaluation of the fire risk capital requirement within non-life underwriting risk.

The Company has not used any undertaking-specific parameters in calculating the SCR.

The table below outlines the components of the MCR as at the end of the current and prior financial years:

	2023	2022
	€'000	€'000
Linear MCR	6,833	7,967
SCR	61,264	63,858
MCR cap	27,569	28,736
MCR floor	15,316	15,965
Combined MCR	15,316	15,955
Absolute floor of the MCR	4,000	4,000
MCR	15,316	15,955

The MCR is calculated by applying the factors specified in the regulation to underlying drivers: premiums and best estimate liabilities by lines of business for non-life business. Ultimately, the MCR is driven by the floor calculated as 25% of the SCR. The increase in the MCR is therefore driven by the increase in SCR described above.

See template S.28.01.01 in the annex to this report for a further breakdown of the MCR calculation.

The Company was fully compliant with the MCR requirements throughout the reporting period.

E.3. USE OF THE DURATION-BASED EQUITY RISK SUB-MODULE IN THE CALCULATION OF THE SOLVENCY CAPITAL REQUIREMENT

The Company has chosen not to use the duration-based equity risk submodule.

E.4. DIFFERENCES BETWEEN THE STANDARD FORMULA AND ANY INTERNAL MODEL USED

For the calculation of the regulatory capital requirement, the Company uses the standard formula and does not use an internal model.

E.5. NON-COMPLIANCE WITH THE MINIMUM CAPITAL REQUIREMENT AND NON-COMPLIANCE WITH THE SOLVENCY CAPITAL REQUIREMENT

There was no breach of the SCR or MCR over the reporting period.

E.6. ANY OTHER INFORMATION

There is no other material information regarding capital management.
